PROFESSIONAL SUMMARY

Information Technology graduate and Software Engineering Intern with hands-on experience in Flutter and Dart application development. Skilled in responsive UI development, REST API integration, JSON handling, GetX and Provider state management, Firebase Authentication, Cloud Firestore, and Git/GitHub. Experienced in building reusable Flutter components, cross-platform applications, and debugging application issues. Seeking a Junior Flutter Developer or Flutter Developer Intern role.

TECHNICAL SKILLS

Languages: Dart, Python, Java

Framework: Flutter

State Management: GetX, Provider

Backend & Database: Firebase, Cloud Firestore

API & Networking: REST APIs, HTTP, JSON, Postman

Tools: Git, GitHub, Android Studio, VS Code

Concepts: OOP, Data Structures & Algorithms, Responsive UI, Reusable Components

EXPERIENCE

Software Engineering Intern | Elevation Business Solution

June 2026 – August 2026

- Developed cross-platform mobile application features using Flutter and Dart.
- Integrated REST APIs and handled JSON data for application features.
- Implemented state management and navigation using GetX.
- Built responsive and reusable UI components for different screen sizes.
- Debugged application issues and contributed to feature implementation and bug fixing.
- Used Git and GitHub for version control and collaboration with senior developers.

PROJECTS

1. Flutter E-Commerce Application

GitHub: github.com/tanveer3894/flutter-ecommerce-app

Tech Stack: Flutter, Dart, Firebase Authentication, Cloud Firestore, Provider, GetX, REST APIs

- Developed a responsive Flutter E-Commerce application with mobile and desktop layouts.

- Implemented Firebase Authentication including Login, Signup, Forgot Password, password reset, and Logout.
- Built product search and filtering functionality.
- Implemented shopping cart features including add/remove products, quantity management, and total price calculation.
- Developed Wishlist/Favorites functionality with persistent local storage.
- Built checkout and order management functionality.
- Used Provider and GetX for state management and navigation.
- Managed source code using Git and GitHub.

2. Vantedge Dummy Code

GitHub: github.com/tanveer3894/vantedge_dummy_code

Tech Stack: Flutter, Dart, GetX, REST API

- Developed Flutter UI screens and reusable widgets.
- Implemented responsive layouts for different screen sizes.
- Used GetX for state management and navigation.
- Integrated REST APIs and handled JSON data parsing.
- Participated in debugging, bug fixing, and feature implementation.

EDUCATION

Bachelor of Science in Information Technology

University of Education Lahore, Pakistan | September 2022 – June 2026 GPA:

3.35 / 4.0

Final Year Project

Retinal Disease Detection Using Deep Learning github.com/tanveer3894/retinal-disease-detection

Python,

TensorFlow, OpenCV

- Developed a CNN-based retinal disease detection system.
- Classified Cataract, Glaucoma, Diabetic Retinopathy, and Normal retinal images.

CERTIFICATIONS & ACHIEVEMENTS

-
- Certificate of Participation — International Conference on RACSIT (Recent Advances in Computer Science and Information Technology)
 - Prime Minister Youth Laptop Scheme 2023
